Proceedings of the FLORIDA STATE Horticultural Society 1962

VOLUME LXXV PRINTED 1963

CONTENTS

Officers for 1962 IV
Officers for 1963 V
Constitution and By-Laws VI
Awards for Outstanding Papers XVI
Honorary Members XVII
Award of Honorary Memberships XVIII
Dr. Hume's Statement XXIX
President's Annual Address, John Henry Logan, Clearwater 1

CITRUS SECTION

Citrus Breeding in Florida—Past, Present and Future, W. C. Cooper, P. C. Reece and J. R. Furr, U. S. D. A. Crops Research Division, Orlando 5
Field Trials with a Wind Machine, J. F. Gerber, Assistant Climatologist, Florida Agricultural Experiment Station, Gainesville and J. N. Busby, Asst. Director, Agricultural Extension Service, Gainesville 13
The Medfly Strikes the Third Time, William Gardner Cowperthwaite, Division Director, Division of Plant Industry, State Department of Agriculture, Gainesville 19
Some Possible Economic Consequences of a Severe Outbreak of Tristeza to the Florida Orange Industry, Roy G. Stout, Cecil N. Smith, Wilson B. Riggan and Chen-Tuan Li, University of Florida, Gainesville 21
Aculus Pelekassi Keifer, Another Citrus Mite in Florida, H. A. Denmark, Division of Plant Industry, Florida Department of Agriculture, Gainesville 25
Combatting Iron Oxide Deposits in Drain Lines, Harry W. Ford and W. F. Spencer, Florida Citrus Experiment State, Lake Alfred 27

A Topping Machine for Florida Citrus Groves, P. J. Jutras and D. W. Kretchman, Florida Citrus Experiment Station, Lake Alfred 32

The Influence of Pruning on Size and Quality of Florida Grapefruit, D. W. Kretchman and P. J. Jutras, Florida Citrus Experiment Station, Lake Alfred 35

Malpractices in the Citrus Nursery That Predispose Grove Trees to Disease, L. C. Knorr, Florida Citrus Experiment Station, Lake Alfred 42

Distribution of Microorganisms, Citrus Feeder Roots, Nitrate Production and Nutrients in The Profile of Leon, Scranton, Immokalee, and Blanton Fine Sands, Harry W. Ford, Florida Citrus Experiment Station, Lake Alfred, and Charles F. Eno, Florida Agricultural Experiment Station, Gainesville 49

The Influence of Chemical Fruit-Set Sprays on Yield and Quality of Citrus, A. H. Krezdorn, University of Florida, Gainesville, and M. Cohen, Florida Citrus Experiment Station, Gainesville 53

A Comparison of Rootstocks for Tahiti Lime on Rockdale Soils in Florida, C. W. Campbell and F. B. Lincoln, Sub-Tropical Experiment Station, Homestead 61

The Influence of Cultivation and Weed Control in Jamaican Citrus, R. E. Wyss, Worthy Park Estate, Jamaica 63

The Use of Leaf, Fruit, and Soil Analysis in Estimating Potassium Status of Orange Trees, R. C. J. Koo, Florida Citrus Experiment Station, Lake Alfred 67

Range of Pathogenicity of Florida Cultures of The Foot Rot Fungus, Gordon R. Grimm and Rodney Whidden, USDA Crops Research Division, Orlando 73

Aseptic Growth of Radopholus Similis (Cobb) Thorne on Okra Root Callus Tissue, William A. Feder, Philip C. Hutchins, and Rodney Whidden, USDA Crops Research Division, Orlando 74

A Nitrogen Source Experiment with Valencia Oranges on Two Soil Types in the Indian River Area, David V. Calvert, and R. R. Hunziker, Indian River Field Laboratory, Ft. Pierce, and Herman J. Reitz, Florida Citrus Experiment Station, Lake Alfred 77

Effects of 1961-62 Winter Freezes on Valencia Oranges in Florida, Texas and California, W. C. Cooper, Ascension Peynado, and J. R. Furr, U.S.D.A. Crops Research Division, Orlando 82

The Effectiveness of Ethion Against Mites that Feed on Florida Citrus, Roger B. Johnson, Florida Citrus Experiment Station, Lake Alfred 89

Citrus Exports and The European Common Market, Cecil N. Smith, University of Florida, Gainesville 94

Preference and Use of Pesticides on Citrus During a Ten Year Period, William A. Simanton, Florida Citrus Experiment Station, Lake Alfred 99

Thirty-Year Records (1932-1961) of Costs and Productivity of Marsh Grapefruit in Southern Lake County, Werner Husmann, Apshawa Groves, Inc., Clermont, Louis W. Ziegler, University of Florida, Gainesville and Marshall R. Godwin, Florida Citrus Commission, Lakeland 104

Character Differences Among Seedlings of the Persian Lime, Philip C. Reece and J. F. L. Childs, U.S.D.A. Crops Research Division, Orlando 110

Past and Present in The Citrus Industry, A. F. Camp, Lake Alfred 117

A Case of Sodium Toxicity in Citrus, Paul F. Smith, U. S. Horticultural Field Station, Orlando 120

VEGETABLE SECTION

A Comparison of In-The-Row and Over-All Soil Fumigation for the Control of Plant Nematodes, H. L. Rhoades, W. T. Scudder, Central Florida Experiment Station, Sanford, and E. S. Holmes, University of Florida, Gainesville 125

Herbicides for Cabbage, Cauliflower and Broccoli, D. S. Burgis, Gulf Coast Experiment Station, Bradenton 130

Lime and Minor Element Studies with Watermelons, S. J. Locascio, Vegetable Crops Dept., Gainesville and H. W. Lundy, Suwannee Valley Station, Live Oak 131

Lightning Damage in Watermelon Fields, J. M. Crall, Florida Agricultural Experiment Stations, Leesburg 136

Plant Nematode Distribution as Affected by Crop History of Sandy Soils in South Florida, J. A. Winchester, Everglades Experiment Station, Belle Glade and N. C. Hayslip and A. E. Ketschmer, Jr., Indian River Field Laboratory, Ft. Pierce 139

Insecticidal Control of the Cabbage Looper, *Trichoplusia NI* (HBN.) in the Hastings, Florida Area, R. B. Workman, Potato Investigations Laboratory, Hastings 143

The Response of Sweet Peppers in Everglades Organic Soils to P and K Fertilization, Charles C. Hortenstine, Florida Agricultural Experiment Station, Gainesville 146

Adaptable Varieties, Herbicides and Plant Spacing for Bulb Onions on Sandy Land, D. G. A. Kelbert and D. S. Burgis, Gulf Coast Experiment Station, Bradenton 153

Effect of Time of Seeding and Varieties on Onion Production and Quality When Grown in Two Soil Types, V. L. Guzman, Everglades Experiment Station, Belle Glade, and N. C. Hayslip, Indian River Field Laboratory, Ft. Pierce 156

The Survey of Xanthomonas Vesicatoria Resistance to Streptomycin, P. L. Thayer, Everglades Experiment Station, Belle Glade and R. E. Stall, Indian River Field Laboratory, Fort Pierce 163

Effects of Amino Acid Antimetabolites Upon Nematodes and Tomatoes, A. J. Overman and S. S. Woltz, Gulf Coast Experiment Station, Bradenton 166

Comparison of Covered to Non-Covered Side Dressing of Urea, Ammonium Nitrate, Uran, Feran and Calcium Nitrate on Sweet Corn, G. M. Volk, Florida Agricultural Experiment Station, Gainesville 170

Effectiveness of Various Methods of Applying Systemic Insecticides to Tomatoes, R. M. Baranowski, Sub-Tropical Experiment Station, Homestead 176

Tomato Variety Evaluation on Sandy Soils for Pink Harvest, Norman C. Hayslip, Indian River Field Laboratory, Ft. Pierce, and Paul H. Everett, South Florida Field Laboratory, Immokalee 180

Insecticides and Intervals Between Applications for Leafminer Control on Celery, Emmett D. Harris, Jr. Everglades Experiment Station, Belle Glade 184

Weed Control in Celery with CDAA and CDEC, J. R. Orsenigo, Everglades Experiment Station, Belle Glade 189

Concentration of N^6 Benzyladenine, Temperature and Time Effects on Retardation of Senescence in Celery and Endive, V. L. Guzman, Everglades Experiment Station, Belle Glade 196

Fertilizer Experiments with Spinach, R. B. Forbes and P. J. Westgate, Central Florida Experiment Station, Sanford 201

Forecasting Late Blight of Potato at Hastings, Florida, A. H. Eddins, Hastings 206

Compatibility of Insecticides, Fungicides, and Foliar Fertilizers on Watermelon, N. C. Schenck and W. C. Adlerz, Florida Agricultural Experiment Station, Leesburg 209

Progress Report on Pole Bean Breeding at the Sub-Tropical Experiment Station, Robert A. Conover, Sub-Tropical Experiment Station, Homestead 212

Strawberry Nursery Weed Control, S. J. Locascio, Florida Agricultural Experiment Station, Gainesville 215

Time of Planting and Harvesting of Tender Vegetable Crops in the Quincy, Florida, Area, H. W. Young, North Florida Experiment Station, Quincy 218

Electrostatic Dusting in Beans, T. W. Casselman, P. L. Thayer and Wm. G. Genung, Everglades Experiment Station, Belle Glade 220

Fungicidal Control of Watermelon Foliage Diseases, 1958-1961, N. C. Schenck and J. M. Crall, Florida Agricultural Experiment Station, Leesburg 223

Growth Rates and Projecting Yields in Celery Production, Roy G. Stout, Florida Agricultural Experiment Station, Gainesville and Raymond H. Hancock, U. S. D. A. Statistical Reporting Service, Orlando 229

A Brief History of the Commercial Vegetable Industry, F. S. Jamison, University of Florida, Gainesville 234

Possibilities of Improving Eating Quality of Shipped Fresh Corn with the High Sugar Retention Property of the Shrunken 2 Character, Emil A. Wolf, Everglades Experiment Station, Belle Glade 236

Evaluation of Petroleum and Plastic Resin Sprays as Soil Sealants and Mulches for Vegetables, J. F. Darby, W. T. Scudder and B. F. Whitner, Central Florida Experiment Station, Sanford 240

A Study of Sources, Rates and Methods of Application of Nitrogen on Sweet Corn, W. K. Robertson, Florida Agricultural Experiment Station, Gainesville 249

Growing Tomatoes and Cucumbers with High Analysis Fertilizer and Plastic Mulch, C. M. Geraldson, Gulf Coast Experiment Station, Bradenton 253

Intraseasonal Variations in the Nutrient Content of Young Tomato Leaves, Paul G. Orth and R. W. Harkness, Sub-Tropical Experiment Station, Homestead 260

HANDLING AND PROCESSING SECTION

Factors Influencing the Quality of Florida Canned Tomatoes, G. D. Kuhn and R. A. Dennison, Florida Agricultural Experiment Station, Gainesville 269

Dehydration Studies of Lychee Fruit, G. D. Kuhn, Florida Agricultural Experiment Station, Gainesville 273

Consumer Preference for High-Sugar Sweet Corn Varieties, R. K. Showalter, Florida Agricultural Experiment Station, Gainesville and L. W. Miller, A. Duda and Sons, Inc., Oviedo 278

The Blue Lake Grape and Its Potential for Processed Juice, R. A. Dennison, Florida Agricultural Experiment Station, Gainesville, and L. H. Stover, Watermelon and Grape Investigations Laboratory, Florida Agricultural Experiment Station, Leesburg 281

Ascorbic Acid Oxidase in Citrus, H. M. Vines, Florida Citrus Experiment Station and M. F. Oberbacher, Florida Citrus Commission, Lake Alfred 283

Progress and Trends in Prepackaging Florida Fruits and Vegetables, John L. Ginn, Transportation and Facilities Research Division, U. S. D. A., Orlando 287

Three Year Study on Hesperidin Recovery as Related to Valencia Orange Maturity, R. Hendrickson and J. W. Kesterson, Florida Citrus Experiment Station, Lake Alfred 289

The Relationships among Several Physical and Chemical Measurements Made on Oranges, W. C. Long, Florida Citrus Experiment Station, Lake Alfred 292

Some Effects of Treatment Conditions on the Color-Adding of Temple Oranges, F. W. Hayward, W. G. Long, Florida Citrus Experiment Station, and M. F. Oberbacher, Florida Citrus Commission, Lake Alfred 295

Harvesting Citrus Fruit With An Inertia Shaker, G. E. Coppock, Florida Citrus Commission, and J. J. Jutras, Florida Citrus Experiment Station, Lake Alfred 297

Water Damage in the Hydrocooling of Citrus Fruits, F. W. Hayward, Florida Citrus Experiment Station, Lake Alfred 302

Varietal Differences in Firmness and Placental Breakdown on Tomatoes, C. B. Hall, Agricultural Experiment Station, Gainesville, and J. M. Walter, Gulf Coast Experiment Station, Bradenton 304

The Occurrence and Evaluation of Pectin in Component Parts of Valencia Oranges During Maturation, A. H. Rouse, C. D. Atkins and E. L. Moore, Florida Citrus Experiment Station, Lake Alfred 307

The Effects of Storage Conditions on Sugar Content of Fresh Blackeye Peas, F. W. Knapp and G. D. Kuhn, Florida Agricultural Experiment Station, Gainesville 311

Frozen Concentrated Orange Juice-Development and Significance, L. G. MacDowell, Florida Citrus Commission, Lakeland, E. L. Moore and C. D. Atkins, Florida Citrus Commission and Florida Citrus Experiment Station, Lake Alfred 318

An Air-Flow Pattern for Truck Shipments of Citrus Packed in the 4/5-Bushel Corrugated Carton, Russell H. Hinds, Jr., Transportation Research Branch Agricultural Marketing Service, U. S. D. A., Orlando 320

Decay and Rind Breakdown of Oranges in Fiber-Board Cartons and Wirebound Boxes, A. A. McCornack and E. F. Hopkins, Florida Citrus Experiment Station, Lake Alfred 323

Storage Requirements for Pope's Summer Orange, William G. Chance, Jr. and Paul L. Harding, Agricultural Marketing Service, U. S. D. A., Orlando 326

Relation Between Hunter Color-Difference Meter Values and Visual Color of Commercial Frozen Concentrated Orange Juice, F. W. Wenzel, Florida Citrus Experiment Station and R. L. Huggart, Florida Citrus Commission, Lake Alfred 331

Studies in the Dehydration of Celery, Harvey J. Gold, U. S. Fruit and Vegetable Products Laboratory, Winter Haven 336

Cloud and Flavor Stability in Relation to Density of Frozen Concentrated Orange Juice, Theo J. Kew, U. S. Fruit and Vegetable Products Laboratory, Winter Haven 342

Further Observation on Holding 6-oz. Cans of Frozen Concentrated Orange Juice at Room Temperature and 40° F, D. I. Murdock and Charles H. Brokaw, Minute Maid Company, Orlando 349

KROME MEMORIAL SECTION

Summer Avocado Varieties, John Popenoe, Sub-Tropical Experiment Station, Homestead 358

Adaptation Trials of Tropical and Subtropical Fruits on Sandy Soils in Broward County, Florida, C. W. Campbell, J. Popenoe, Sub-Tropical Experiment Station, Homestead and H. Y. Ozaki, Plantation Field Laboratory, Ft. Lauderdale 361

Ferbam As a Control for Avocado Scab, George D. Ruehle and Robert A. Conover, Sub-Tropical Experiment Station, Homestead 363

Effects Of Nitrogen, Potassium and Calcium Fertilization on Kent Mangos on Deep, Acid, Sandy Soil, T. W. Young, Sub-Tropical Experiment Station, Homestead; Robert C. J. Koo, Florida Citrus Experiment Station, Lake Alfred and James T. Miner, Boynton Beach 364

Distribution of Peach Roots in Lakeland Fine Sand and the Influence of Fertility Levels, C. G. Lyons, Jr. and A. H. Krezdorn, Florida Agricultural Experiment Stations, Gainesville 371

The Performance of Peach Varieties at Quincy, Florida, H. W. Young, North Florida Experiment Station, Quincy 377

Effect of Temperature on Germination of Okinawa Peach Seeds, R. H. Biggs and Mary C. Langan, Department of Fruit Crops, University of Florida, Gainesville 379

Papaya Fruit Fly Control, D. O. Wolfenbarger, Sub-Tropical Experiment Station, Homestead 381

A Progress Report on Some Mango Hybrids, David Sturrock, West Palm Beach 384

The Mango in Florida—1887 to 1962, H. W. Wolfe, University of Florida, Gainesville ... 387

Blackberries for Central Florida, P. J. Westgate and R. B. Forbes, Central Florida Experiment Station, Sanford 391

Rare Fruit Council Activities 1961-62, Wm. F. Whitman, Bal Harbour, and Joseph P. Biebel, South Miami 393

The Mamey, Julia F. Morton, Morton Collectanea, University of Miami, Coral Gables ... 400

Some Factors Influencing the Properties of Lychee Jelly, G. D. Kuhn, Florida Agricultural Experiment Station, Gainesville 408

A New Technique for Inducing Early Fruiting in Mango Hybrids Based on the Movement of Hormones, L. B. Singh, Horticultural Research Institute, Saharanpur, U. P., India 410

Pollination and Fruit Set of Yellow Passionfruit in Southern Florida, R. J. Knight, Jr. USDA, Crops Research Division, Miami and H. F. Winters, Beltsville, Maryland 412

Herbicide Trials with Young Tropical and Sub-tropical Fruit and Nut Trees, Murray H. Gaskins, Crops Research Division, ARS, U. S. D. A., Miami and Harold F. Winters, Beltsville, Maryland 418

Comparison of Wrapping and Scion Coating Materials in Grafting Pecans, S. E. McFadden, Jr., Florida Agricultural Experiment Station, Gainesville 421

ORNAMENTAL SECTION

Preliminary Investigations of a Leaf Spot of Kelanchoe Spp., Edward K. Sobers, Division of Plant Industry, Florida State Dept. of Agriculture, Gainesville 427

Jasminum Species in Cultivation in Florida and Their Correct Names, Robert W. Read, The Fairchild Tropical Garden, Miami 430

Adaptation Trials of Cordia Species at Homestead, Florida, C. W. Campbell, Florida Sub-Tropical Experiment Station, Homestead 437

Changes in the Marketing of Foliage Plants, John R. Brooker and Cecil N. Smith, University of Florida, Gainesville 439

Effect of Gamma Rays on Chrysanthemum Morifolium 'Bluechip' Grown at Various Nutritional Levels, R. T. Poole, Florida Agricultural Experiment Station, Gainesville 443

Growth and Flowering of Bougainvillea Glabra 'Sander' as Affected by Photoperiod and Levels of Nitrogen and Potassium, Jasper N. Joiner, R. D. Dickey and T. J. Sheehan, Florida Agricultural Experiment Station, Gainesville 447

Variable Photoperiod and CCC Effects on Growth and Flowering of Gardenia Jasminoides 'Veitchii,' J. N. Joiner and R. T. Poole, Florida Agricultural Experiment Station, Gainesville 449

Effects of Photoperiod, Propagation Date and Dwarfing Compounds on Growth and Flowering of Poinsettias, Jasper N. Joiner and T. J. Sheehan, Florida Agricultural Experiment Station, Gainesville 451

Stimulation of Pansy Bloom, Number and Diameter With Gamma Irradiation, A. T. Wallace, Florida Agricultural Experiment Station, Gainesville 456

Effects of Fertilization Rates and Frequencies on Potted Chrysanthemum Production, W. E. Waters, Gulf Coast Experiment Station, Bradenton 460

Chemical Weed Control in Gladiolus Cormels, W. E. Waters, Gulf Coast Experiment Station, Bradenton 464

Fluoride Toxicity in Gladiolus and Methods of Amelioration, S. S. Woltz, Gulf Coast Experiment Station, Bradenton 469

Necrotic Ringspot, A Virus Disease of Ligustrum Spp., Harry C. Burnett and Charles O. Youtsey, Division of Plant Industry, Florida Department of Agriculture, Winter Haven 472

Seventy-five Years of Ornamental Horticulture in Florida 1888-1962, John V. Watkins, University of Florida, Gainesville 476

Pre-Emergence Weed Control in Field Grown Woody Ornamental Plants, J. L. Taylor, University of Florida, Gainesville 480

Ornamental Plants with Toxic and/or Irritant Properties. II., Julia F. Morton, Morton Collectanea, University of Miami, Coral Gables 484

Effects of Container Size, Time in Container and Transplanting Method on Growth of Podocarpus Macrophylla Maki, Rhododendron Indicum 'Formosa' and Ligustrum Japonicum, R. D. Dickey, University of Florida, Gainesville 491

Distortion of Young Cedars by An Eriophyid Mite, Tirsetaeus Cupressi (K), L. C. Kuitert, Florida Agricultural Experiment Station, Gainesville 495

Rosa Fortuneana Compared with Other Rose Rootstocks Grown in Florida, S. E. McFadden, Jr., Florida Agricultural Experiment Station, Gainesville 497

ANNUAL REPORTS

Necrology 501

Report of Executive Committee 505

Annual Business Meeting 505

Resolutions 505

Report of Membership Committee 506

Report of Treasurer 506

List of Members 507

AWARDS FOR OUTSTANDING PAPERS

Awards for Outstanding Papers in Volume 74 of the PROCEEDINGS of the Florida State Horticultural Society, presented at the General Session of the 75th Annual Meeting of the Society (Nov. 1, 1962) by Dr. J. R. Beckenbach, Director of the Florida Agricultural Experiment Stations.

Citrus Section

A Comparison of Ten Nitrogen Sources for Valencia Oranges. C. D. LEONARD, IVAN STEWART, Citrus Experiment Station and I. W. WANDER, Growers Fertilizer Cooperative, Lake Alfred.

Krome Memorial Section

Influence of Gibberellic Acid, Naphthaleneacetic Acid, Indole-3-Acetic Acid and Maleic Hydrazide on Peach Bud Dormancy. K. S. CHAUHAN, R. H. BIGGS and J. W. SITES, Agricultural Experiment Stations, Gainesville.

Vegetable Section

Effects of Spacing, Fertilizer, and Variety upon Pepper Yields. HENRY Y. OZAKI, Plantation Field Laboratory, Fort Lauderdale.

Ornamental Section

A Decade of Growth in the Florida Flower and Nursery Industry. CECIL N. SMITH, Agricultural Experiment Stations, Gainesville.

Handling and Processing Section

Techniques in the Isolation of Volatile Materials from Celery and Identification of Some Compounds with Acidic Properties. HARVEY J. GOLD and CHARLES W. WILSON, III. U. S. Fruit and Vegetable Products Laboratory, Winter Haven.
